

The one rule

Strip the client's identity before you paste.

An AI assistant needs the trip. It never needs the person. Replace names with "the client" or "the couple." Replace booking numbers with "[booking]." The answer is just as good.

Paste text. Do not upload files.

Safe to paste	Never paste
Who is traveling, in general terms (a couple in their sixties, a family of five)	Name
Dates and length of trip	Passport number, date of birth
Budget	Home address, phone number
Likes and dislikes	Loyalty number
The question they asked	Card or payment details, booking numbers

Two privacy settings, thirty seconds each

Both tools can use what you type to improve their models unless you turn that off.

- **ChatGPT:** Settings, Data controls, turn off "Improve the model for everyone."
- **Claude:** Settings, Privacy, turn off the model improvement option.

Before you paste an email you wrote

Copy the text into a plain document, then edit it there. Your voice is in what is left.

Delete	Keep
Client names (replace with "the client")	How you open and how you close
Booking and confirmation numbers	The phrases you always use
Dates of birth	Everything else
Addresses and phone numbers	
Anything about payment
